Instructions for submitting your programming assignments

The description of your program requirements is attached to the assignment dropbox.

When submitting your solution, please submit only your source file (filename.c) by the due date as specified. Do not submit the executable (.exe) file.

The source file should be submitted as an _attachment_ to the assignment dropbox. It should be named using the following naming convention:

- First initial of first name
- First 6 characters of your last name
- p# where # is the programming assignment number.

For example, if your name is Mark Johnson, and if this is programming Assignment 1, your source code filename should be:

mjohnsop1.c

(Notice all lowercase characters.)

Your source code solution should be created using some sort of compiler/editor (Examples: vi, emacs, C-Free, Microsoft Visual C++, etc.).

Specific questions should be directed to me via Blackboard Mail. **_Please, do not post any portion of your program in the discussion area._**

Be sure to use the **Sample Programming Assignment** in the **Start Here** folder on the Home Page as a guide for your source code. I will be using the **Programming Assignment Point Deductions** (also in the Start Here folder) as a guide for grading your solutions.

To submit your assignment in the assignment dropbox:

After completing the assignment (and saving your source file on your computer), click the **Programming Assignment Dropbox** link (located at the bottom of the weekly folder). Then, submit your assignment following these steps below:

1. Scroll down to Section 2 (Assignment Submission) and locate the "**Attach File**" section.
2. Choose "**Browse My Computer**".
3. Locate your source file (with the .c extension) that you had saved on your computer.
4. Double click on the file and you will see your attachment.
5. **Important**: Be sure to scroll to the bottom of the page and click: "**Submit**"

If you have any questions regarding the assignment, please send them to me via Blackboard Mail.

I will usually grade your assignment within a week of its submission.
